01 / CRITIQUE OF THE V0 PDF AND THE LIVE APP

Design review

What was wrong, why it matters, and the rule that replaces it. Verified against the repository (CSS, JS, i18n) — not assumed.

Verified = read from code.
Proposed = DS 1.0 change, needs approval.

01 Palette

The live app is not monochrome: indigo accent (#4338CA/#6366F1), blurred indigo blobs on login, indigo/violet background pattern, green/amber/blue chips, gold/silver/bronze gradient podium, hue-coded avatars and groups, indigo admin sidebar (#312E81), red badges, green unread counters, amber offline banner, a purple-heart emoji in UI copy. The PDF presented this as already monochrome — it is not.

✓ **Every colour → official tokens; state = contrast, weight, border style, icon.**

02 Tokens

PDF defined colours only as swatches with no roles (button, nav, badge, overlay), so the same grey meant different things on different boards.

✓ **Role-based official tokens; one alias layer; nothing hard-coded.**

03 Contrast

PDF used #999 for labels and table headers. #999 on #FFF = 2.85:1 (fails WCAG AA text).

✓ **--text-muted only for placeholders, disabled, timestamps; essential text uses --text-secondary (5.74:1).**

04 Type

Ranges instead of values (28–32 px, 'Inter · consistent weights'); 800 weights in the app; the PDF type card overlapped neighbouring cards.

✓ **Fixed scale: 30/22/17/15/14/13/12, weights 400/500/600 (700 only for counters/wordmark).**

05 Geometry

'Buttons 8–10 px, cards 12–16 px' as ranges; app mixes 9/10/12/13/14/16/18 px radii and 34–58 px control heights.

✓ **Control 10, card 14, dialog 16, pill; heights 32/40/44.**

06 States

Only default/disabled shown. No hover, focus, active, error, loading; dark focus ring missing.

✓ **Full state matrix per component, both themes; 2 px ink focus ring + 2 px offset.**

07 Destructive & error

Red relied on for errors/deletes; colour-only meaning fails colour-blind users.

✓ **Monochrome: alert icon + 1.5 px ink border + explicit verb + confirmation dialog.**

08 Icons

Settings glyph ≈ Sun glyph (theme toggle sits next to it); Chats and Feedback share one icon in admin; ⏻ ⇄ ← glyphs and ~70 emoji used as UI icons (medals, file types, toasts).

✓ **SVG only, 1.8 stroke, currentColor; new sliders/back/swap/alert glyphs; emoji stay only as user content.**

09 Navigation

PDF invented a 'Tələbələr' student-nav item and 'Parametrlər'; labels mixed ('Əsas' vs 'Ana səhifə', 'Müraciət' vs 'Müraciətlər').

✓ **Real nav only: Ana səhifə · Qruplar · Çat · Müraciətlər və qrupsuzlar · Bildirişlər · Alətlər · Ayarlar.**

10 Mobile

Phones drawn without status/gesture bars, no keyboard state, chat with a floating search instead of the real composer.

✓ **Safe-area strips in --background, 64 px tab bar, composer pinned above keyboard, tab bar hidden while typing.**

11 Dark theme

Dark boards inverted light ones (pure white buttons on #111 everywhere, unlayered cards).

✓ **Stepped surfaces #111 → #1A1A1A → #262626; borders carry elevation; shadows only on overlays.**

12 Fidelity

Showcase screens cropped mid-component (text overflowing cards, cut-off buttons on 04/05/06).

✓ **Every screen rendered whole at real size (1280×800, 390×844) then scaled.**

02 / COLOUR · TYPE · SPACE · SHAPE

Foundations

Official tokens only. Two themes, one role map. Dark is layered (canvas → surface → elevated), not inverted.

COLOUR TOKENS · LIGHT

Token	Value	Role
--background	#FFFFFF	Page canvas
--background-secondary	#F7F7F7	Chat well, disabled field
--surface	#FFFFFF	Cards, sidebar, bars
--surface-secondary	#FAFAFA	Hover rows, table head
--surface-elevated	#F0F0F0	Secondary btn, selected, menus
--text-primary	#111111	Body, titles, icons
--text-secondary	#666666	Labels, supporting copy
--text-muted	#999999	Placeholder, time, disabled
--border	#E8E8E8	Dividers, card edges
--border-strong	#D4D4D4	Inputs, outline buttons
--button-primary	#111111	Primary action, own bubble
--button-primary-text	#FFFFFF	Text on primary
--button-hover	#2A2A2A	Primary hover
--navigation-active	#111111	Active nav item
--navigation-active-text	#FFFFFF	Text on active nav
--badge-background	#EEEEEE	Neutral badge
--badge-text	#111111	Badge label
--overlay	rgba(0,0,0,.45)	Modal scrim

COLOUR TOKENS · DARK

Token	Value	Role
--background	#111111	Page canvas
--background-secondary	#161616	Chat well, disabled field
--surface	#1A1A1A	Cards, sidebar, bars
--surface-secondary	#202020	Hover rows, table head
--surface-elevated	#262626	Secondary btn, selected, menus
--text-primary	#FFFFFF	Body, titles, icons
--text-secondary	#A3A3A3	Labels, supporting copy
--text-muted	#737373	Placeholder, time, disabled
--border	#333333	Dividers, card edges
--border-strong	#444444	Inputs, outline buttons
--button-primary	#FFFFFF	Primary action, own bubble
--button-primary-text	#111111	Text on primary
--button-hover	#E5E5E5	Primary hover
--navigation-active	#FFFFFF	Active nav item
--navigation-active-text	#111111	Text on active nav
--badge-background	#2A2A2A	Neutral badge
--badge-text	#FFFFFF	Badge label
--overlay	rgba(0,0,0,.65)	Modal scrim

CONTRAST (WCAG 2.2)

Pair	Light	Dark
text-primary on surface	**18.88** AA	**17.40** AA
text-secondary on surface	**5.74** AA	**6.90** AA
text-muted on surface	**2.85** decorative	**3.67** AA large / UI
button-primary-text on button-primary	**18.88** AA	**18.88** AA
text-secondary on surface-elevated	**5.04** AA	**6.00** AA
border-strong on surface	**1.48** decorative	**1.79** decorative

Rule: --text-muted never carries essential information. Input borders (--border-strong) are paired with a label and placeholder so the field is identifiable without the edge alone.

TYPE · INTER (SELF-HOSTED, LATIN + LATIN-EXT: Ə Ə Ğ Ğ Ş Ş İ I Ç Ç Ö Ö Ü Ü)

Ana səhifə H1 · 30/36 · 600 · −2%

RADIUS

6	10	14	16	999
checkbox · kbd	button · input · nav	card · panel	dialog · sheet	badge · avatar

BORDER & ELEVATION

1 px -- border	shadow-2	shadow-3
resting card	menu · toast	dialog · sheet

Dark: elevation = lighter surface (#1A1A1A → #262626) + --border-strong; shadows only on overlays.

BREAKPOINTS (MATCH CURRENT CSS)

≤ 380	Compact phone · 2-col tiles, 12 px gutters
≤ 800	Phone · tab bar 64 px, sheets, full-screen chat
801–1100	Compact desktop · sidebar 220
1101–1399	Desktop · sidebar 248, content ≤ 1240
≥ 1400	Wide · sidebar 280, content ≤ 1480
admin ≤ 900	Sidebar → top bar, horizontal nav

03 / EXISTING SVG SET · RULES · FIXES

Iconography

The current inline set (icons.js, 61 glyphs) already follows the rule: 24 × 24 grid, 1.8 px stroke, round caps & joins, currentColor. DS 1.0 keeps every existing glyph, fixes two collisions and replaces emoji used as interface icons.

CURRENT SET · RENDERED FROM ASSETS/JS/SHARED/ICONS.JS

home, groups, user, chat, inbox, bell, tools, settings, menu
search, school, wrench, chart, puzzle, tag, key, archive, import
monitor, lock, globe, cap, shield, star, crown, bolt, trash
clip, mic, stop, file, image, camera, mail, vote, medal
trophy, dice, target, shuffle, copy, edit, reply, plus, ban
flask, clock, dot, logout, sound, soundOff, sun, moon, half
info, gift, receipt, refresh, check, eye, eyeOff

CONSTRUCTION

16 px 20 px 24 px

- **16** inline with 12–13 px text, badges, help text
- **20** default: nav, buttons, inputs, list rows
- **24** tab bar, empty states, headers
- Live area 18–20 px inside 24; optical centre, no fills except dots
- Always `stroke="currentColor"`; colour comes from text token
- Icon-only buttons need `aria-label`; decorative icons `aria-hidden`

COLLISIONS FIXED (PROPOSED)

vs current settings — look identical

› **New “settings” (sliders)**

Admin Rəy (Feedback) — = Çatlar › use existing inbox

New glyphs: back, swap, x, chevR, chevD, send, more, alert, alertC, filter, wifiOff

upload

EMOJI USED AS INTERFACE ICONS → SVG

🥇 🥈 🥉		`medal`	Podium / medals
🏆		`trophy`	Leaders
🚫		`ban`	Deleted message
📎		`clip`	File preview
🖼️		`image`	Photo preview
🎤		`mic`	Voice preview
🎭		`smile`	Sticker preview
📦		`vote`	Vote
⏻		`logout`	Log out
⇄		`swap`	Switch class
←		`back`	Back
✕ ✖		`x`	Close
✓ ☑️		`check`	Done / accepted
🌱 🚀 🤝		`sprout`	Badge art → one icon per badge
🎉 ✨ ♡	—	–	Remove from UI copy (incl. a purple heart)

Emoji remain only where they are user content: reactions, emoji picker, tag emoji typed by admins, message text.

`--pat, .blob`	›	`removed`

STAGES (EACH NEEDS APPROVAL)

E1 Tokens
Add official tokens to style.css + admin.css; alias old names (--bg→…) so every existing rule keeps working. data-theme light/dark blocks in features.css rewritten. Admin gains data-theme (reads the same localStorage 'theme').

E2 Remove colour
Purge every hard-coded hue in CSS (≈60 rules) and JS (gcol, av hsl, #4f46e5 'Hamı' avatar, #dc2626 vote bar, #7c3aed tag default). Blobs, pattern, gradient podium, glass blur removed.

E3 Type & geometry
Self-host Inter (assets/fonts, add to SW SHELL + build-www allowlist), radius/heights per spec, page titles.

E4 Icons
settings → sliders; add back/swap/x/chev/send/more/alert; ⏻ ⇄ ← and UI emoji → SVG. Emoji kept for reactions/picker/user tags.

E5 Components
States (focus/hover/disabled/error), monochrome badges & status, toasts inverted, confirm dialogs monochrome, chat ink bubble.

E6 Native & meta
theme-color, manifest, Android app_colors.xml app_bg = --background-secondary (#F7F7F7 / #161616) so system-bar strips match the app canvas. No Capacitor config change.

F Tests
Playwright on python3 -m http.server: mock-data render of all screens × 2 themes × 3 widths; pixel scan (R=G=B) for zero hue; console errors; Back/nav stack, modal close, chat keyboard (html.kbd) unchanged; node --check; npm run build; CI APK.

FILES

`assets/css/style.css`	tokens, base controls, chat, sidebar
`assets/css/features.css`	data-theme blocks, tab bar, podium, palette, timer
`assets/css/admin.css`	admin tokens, sidebar, chips, switch, table
`assets/js/shared/icons.js`	settings glyph + new glyphs
`assets/js/app/core.js`	av(), gcol, gchip, prev() emoji
`assets/js/app/pages.js`	⏻ ⇄ ←, 'Hamı' avatar, vote bar
`assets/js/app/extras.js`	badges/podium emoji, ⇄
`assets/js/admin/admin.js`	avatar hsl, Rəy icon, tag default
`index.html · manifest`	theme-color
`android/…/app_colors.xml`	app_bg (2 values)
`sw.js · build-www.mjs`	V bump; fonts in SHELL/allowlist

DO NOT TOUCH

- Auth, claim_session, kickedOut(), Supabase RPCs, push pipeline
- Script order; global names used by the check scripts
- native.js Back mapping, navStack / navSync, admStack
- Viewport metas (viewport-fit=cover web, native override)
- #sheet.chat #msgs height calc and keyboard handling
- Capacitor config, Gradle, plugins

GUARDRAIL

CI-friendly check: `grep` CSS/JS for any hex/rgb/hsl whose channels differ → fail. Allowed: the official tokens, neutral rgba(0,0,0,a)/rgba(255,255,255,a), user-chosen tag colours rendered as monochrome.
